

Electric Process Heaters

Wechsler Technologies has developed one of the highest efficiency, versatile electric heaters on the market. With control options from a simple PID loop to a more elaborate PLC with HMI, the line of Wechsler Electric Heaters is certain to seamlessly tie into your system and fulfill your process heat requirements.

**Output ranging from 100kW
up to 2.0MW**

Pressure rating: up to 3,500 psi

Horizontal or vertical orientation

Efficiency: 99.9%

- » Can heat both thermal fluids (up to 750°F) and process gas (up to 1,400°F)
- » Turndown: 100:1
- » Tight thermal accuracy: 1 - 2°F (application dependent)
- » Skid-Mount: Custom engineered control valving, piping, exchangers, filters, for compact, tailored to client's design or application

Let's talk about optimizing and protecting your process heating environment.
